

TITLE	TYPE - BEST PRACTICE IN:
Joint European Degree label in Engineering	Certification/Accreditation
	BENEFICIARIES
	Private training providers, Public HEI and VET providers
CONTEXT	THE CHALLENGE
Facilitating and harmonising the accreditation of engineering degrees across Europe to redefine the education of engineering, technology and science-oriented degrees.	- Delivering recognised and differential Joint Degrees at all levels, including employers. - Overcoming barriers in national legislations. - Reluctance of national engineering professional associations to recognize foreign programmes.
THE ACTION	
- Designing a prototype label for European joint degrees, based on a common set of European criteria and compatible with engineering, technology and science-oriented degrees. - Testing the label on identified joint programme candidates.	
TAKEAWAYS	
- Use inputs from multiple stakeholders on evaluating the set of criteria and envisioning the long-term application of the label. - Learn from existing resources, well-known labels and engineering accreditation processes, e.g. EUR-ACE.	 Lucía Linares, Project Manager, UPM Ramón Martínez, Project Coordinator, UPM On behalf of JEDI
